DETAILED ACTION

This Office Action is in response to the After-Final Amendment filed on November 18, 2003. Applicants previously amended claims 34 and 60-61, and cancelled claims 1-33, and 35-59.

In the Final-Rejection, mailed on July 18, 2003, claims 30, and 60-61 were indicated allowable. However, upon being reconsideration, Patent number DE 196 54 026 A1 deemed readable on the claims 34 and 61. Accordingly, a new Non-Final Rejection is set forth below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 34 and 61 are rejected under 35 U.S.C. 102(b) as being anticipated by Fuoss (Patent Number DE196 54 026 A1).

Fuoss discloses an exhaust turbo-supercharger (2) for an internal combustion engine; which comprises

an exhaust gas passage for guiding exhaust gas from exhaust manifold of said internal combustion engine into a catalyst (7, 8) through a turbine case (4) of said exhaust turbo-supercharger (2) (See Figure 1);

Art Unit: 3748

a straight pipe (16) connected to an inlet (Not Numbered) of said catalyst (7,8) and integrated in parallel with said exhaust gas passage as a unit (See Figure 1);

an open/close valve (10) or opening and closing said straight pipe (16) when engine started (See Figure 1, and Abstract);

wherein said catalyst (7,8) is arranged in said straight pipe (16) (See Figure 1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 60 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fuoss (Patent Number DE 196 54 026 A1), in view of Piech (patent Number 41 39 291 A1).

Fuoss discloses the invention as recited above; however, Fuoss fails to disclose a motor driving said open/close valve for opening and closing said straight pipe.

Piech teaches that it is conventional in the turbocharged internal combustion engine art, to utilize a motor (42) driving said open/close valve (40) (See Figure).

Art Unit: 3748

It would have been obvious to one having ordinary skill in the art at that time the invention was made, to have utilized a motor driving said open/close valve, as taught by Piech, to control the exhaust flow passing the valve during cold start.
